I have successfully graduated from the 'IT STEP' Computer Academy with a focus on Front-end development.

Throughout my studies, I gained expertise in HTML, CSS, JS, and explored frameworks/libraries such as Node (back-end), Vue, React, and Angular. My emphasis was on the React library, and I utilized the Next.js framework to develop my diploma project.

During my learning journey, I took the initiative to independently seek information and solve complex problems. While I have made significant progress, I recognize the value of having an experienced mentor to accelerate my path towards becoming a senior web developer.

Skills

HTML/CSS	    
JavaScript	    
TypeScript	    
Node.js	    
React.js	    
React Native	    
Vue.js
